XP - N1999-241147  
AB - JP11113780 NOVELTY - A non-woven fabric made of 10-100 wt.% of  
cellulose fabric is impregnated with an aqueous solution containing  
polylysine and/or its salt, glycerol fatty acid ester and ethanol. The  
weight increment due to impregnation is within 0.5-5.  
- USE - For cleaning and wrapping fruits and vegetables, cleansing skin  
etc. For kitchen, refrigerator, toilet etc.  
- ADVANTAGE - The tissue has anti microbial and anti fungal property and  
subsequent contamination by microbes after using the tissue is avoided  
due to the persistent anti microbial property of the tissue. The  
tissue does not damage the skin and has reduced ethanol content
